

IMPORTANTE: Es necesario descargar el SDK de .Net Core.

<https://dotnet.microsoft.com/download>

The screenshot shows the .NET download page for Windows. At the top, there's a navigation bar with the Microsoft logo and links for .NET, About, Learn, Architecture, Docs, Downloads, and Community. Below the navigation bar, a message says: "Not sure where to start? See [Hello World in 10 minutes](#) to install .NET and build your first app." The page is divided into two main sections: .NET Core and .NET Framework. The .NET Core section is highlighted with a red box. It shows the .NET Core logo and the version 2.2. Below the logo, it says ".NET Core 2.2" and ".NET Core is a cross-platform version of .NET for building websites, services, and console apps." There are two buttons: "Build Apps" and "Download .NET Core SDK". The "Build Apps" button is highlighted with a red box. Below it, there's a button for "Run Apps" and "Download .NET Core Runtime". The .NET Framework section shows the .NET Framework logo and the version 4.7.2. Below the logo, it says ".NET Framework 4.7.2" and ".NET Framework is a Windows-only version of .NET for building any type of app that runs on Windows." There are two buttons: "Build Apps" and "Download .NET Framework Dev Pack". Below it, there's a button for "Run Apps" and "Download .NET Framework Runtime".
